Trends

Information Overflow

Information overflow: information comes from unexpected contexts, and becomes fragmented

It makes us impermeable to information & unable to make our own interpretation of reality.

Automation of well-defined jobs

Automation will not only cover trivial tasks like driving, it will also cover design processes, emotional counseling, business administration, etc.

Sociopolitical Shift

Sociopolitical shift: There will either be a major sociopolitical shift such as UBI, or there will be an unprecedented societal collapse

Future needs

short-term

We need environments where to make sense of fragmented information

We need environments where to re-invent our roles

Information overflow:
Information feed needs to be framed in relation to our interests

Sociopolitical shift: We need to be working from the intrinsic interest of working.

An ever-changing and creative process. Our work will consist on inventing the new tasks that will become automated.

long-term

Information Overflow

Sociopolitical Shift

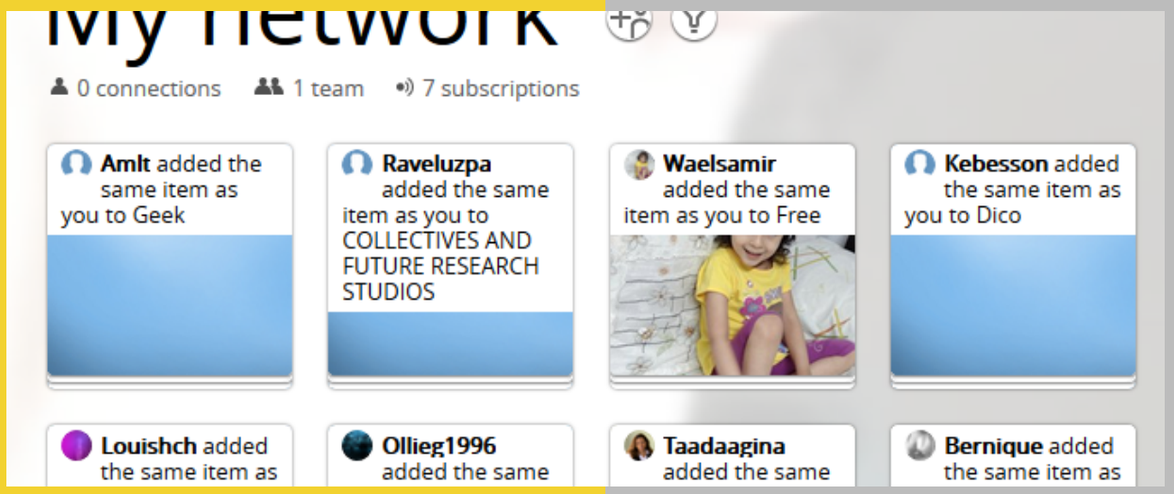
Automation of well-defined jobs

We need a digital environment where to explore, interrelate and reflect upon our surrounding information.

References

Explore

Pearltrees: exploration based on people with similar interests



Feedly: exploration based on news channels

Facebook: exploration based on social & commercial network.

Interrelate

Pearltrees: contents can be grouped in relation to one's own frame

Evernote: convergence of spontaneous ideas, book-marks and files

Reflect

Design thinking toolsets

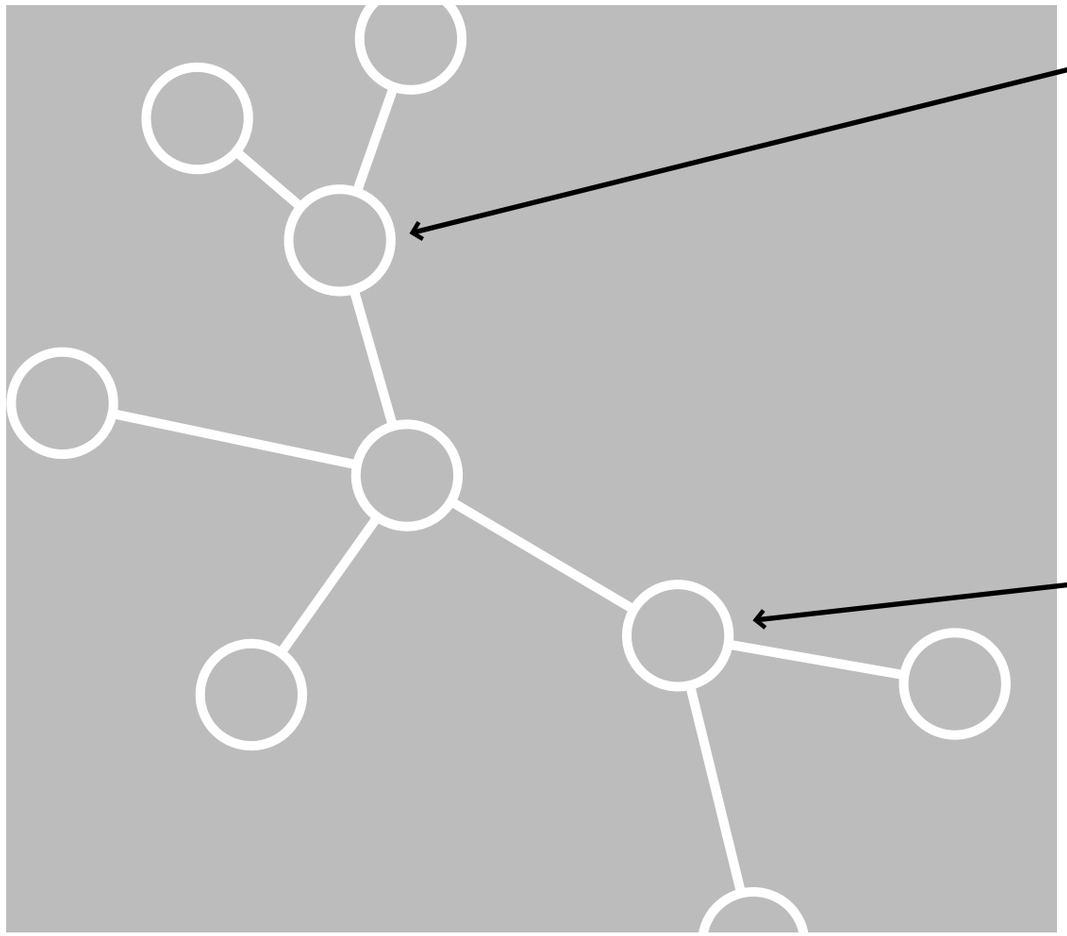
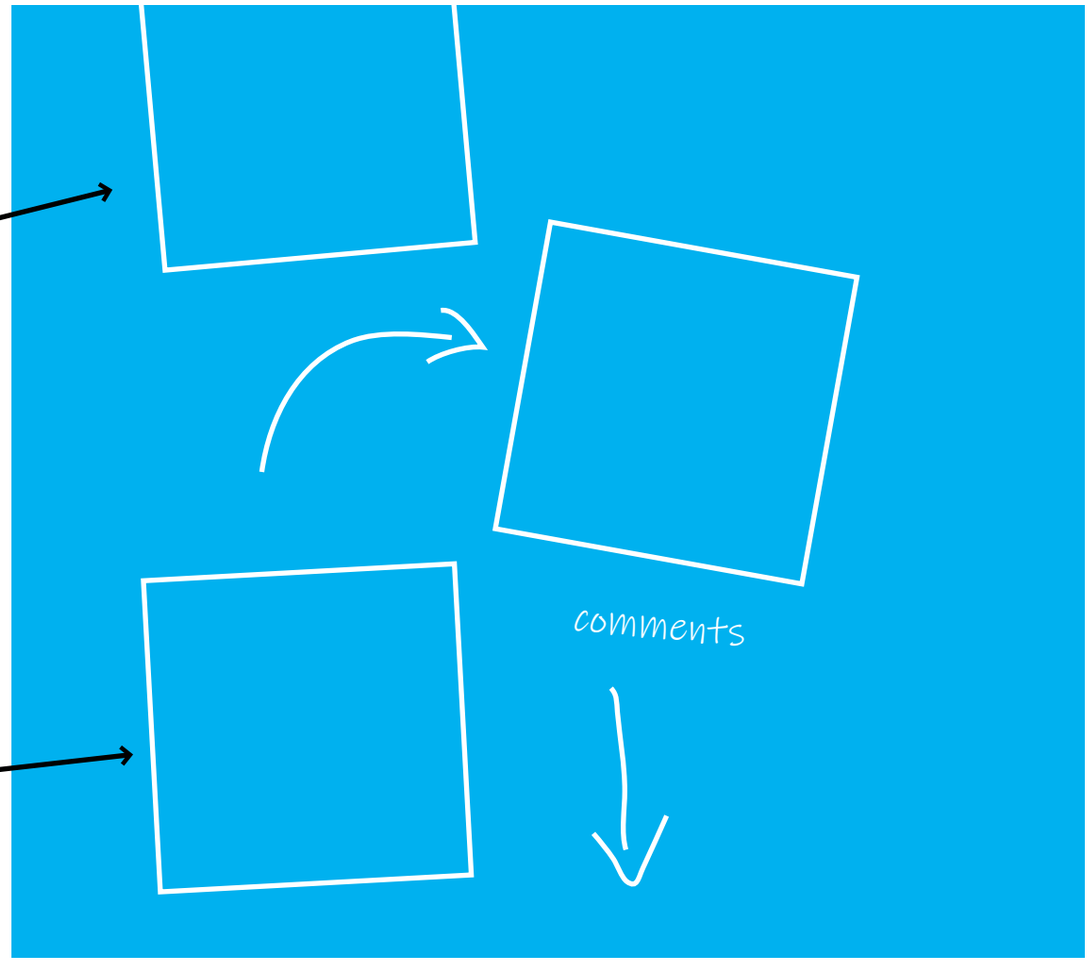
Concept

Library: place to interrelate



- Storage of collected items & boards
- Items can be found by their relation to others, or by tags

Board: place to reflect



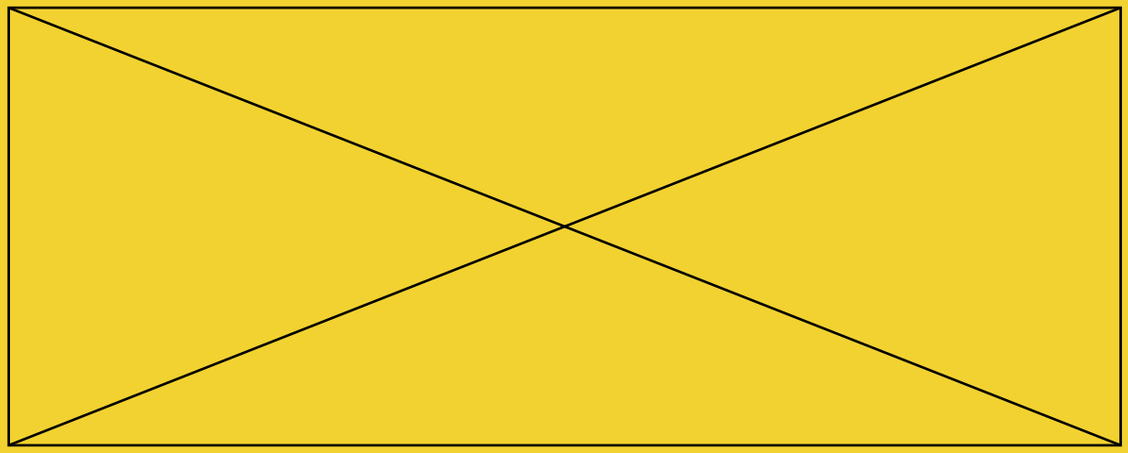
- Is an analogy of a whiteboard
- Items are placed from the library or directly applied in the board
- Boards allow items to appear on more than one topic with different meanings

Curiosity network: place to explore

Writing feed Office feed JavaScript feed

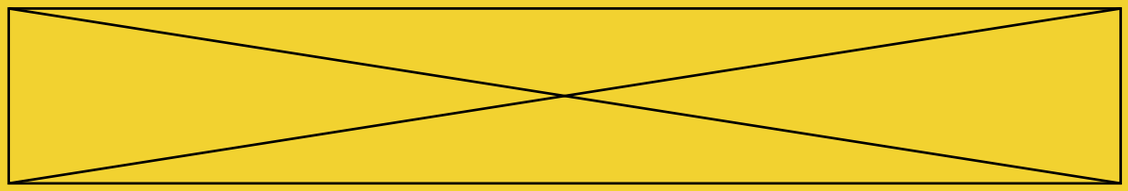
Design-related feed

A new story from a blog you follow



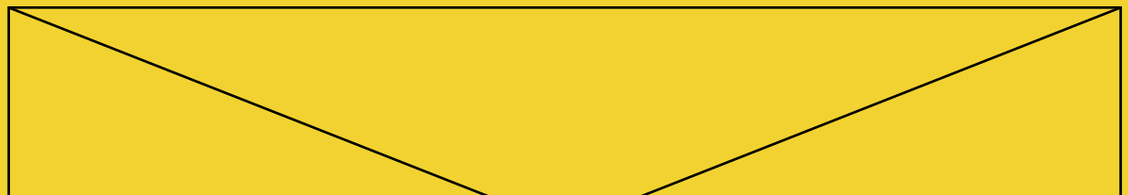
Your friend wants to find a new inspiration to draw

This company is looking for an interaction designer



This person has similar interests to you

A person you follow shared a board about cargo cult



- Works like any social feed, but oriented to creative collaboration
- Content filters prevent distraction
- Artificial intelligence can help broadening one’s professional network.
